Objective

I am an Electronics and Communication Engineering graduate with a strong interest in core electronics, particularly in embedded system design. I have gained hands-on experience and am working on enhancing my skills through practical learning and real-world applications.

Skills

KEY EXPERTISE : Embedded C, Embedded Systems, Circuit Design, Electronic Circuit Design, Image Processing, Assembly Language, Python, Arduino, MASM, ModelSim, MATLAB, Proteus, Firmware, Digital Electronics, 8051 Microcontroller, C, Keil, Automation, Industrial Automation, Internet of Things, Communication Protocols.

Experience

NXON AI Pvt. Ltd. | *Embedded C, espressif-IDE, Microcontrollers, ESP32, Circuit Design* **Dec. 2024 - Present**

- Assigned key responsibilities included customizing and enhancing open-source firmware based on specific client requirements, encompassing user interaction features and system performance optimization.
- Developed a Gemini-powered project on ESP32 with speaker and microphone integration.
- Worked on vision module for drone along with a senior engineer

eInfochips, An Arrow Company | *Research* **Jun. 2024 - Jul. 2024**

- I explored the applications of AI in electronics and researched a company that manufactures electronic products and provides solutions for wireless IoT connectivity.

Midas Metcons Pvt. Ltd. | *Embedded C, 8051 Microcontroller, Arduino Circuit Design* **Jun. 2023 - Jul. 2023**

- I worked on technologies for automated storage systems and programmed the Vertical Lift Module (VLM).

Projects

Vertical Lift Module for Warehouse Automation | *Arduino, Embedded Systems, Keil* **Mar 2024-Present**

- * Designed and coded the VLM control system on Arduino Nano.
- * Integrating Real-Time Operating System (RTOS) for improved task management and efficiency.
- * Also implementing IoT capabilities to enable remote monitoring and control of the VLM.

Assembler for MIPS Processor | *Python, Computer Architecture, Assembler* **Mar 2024-Apr 2024**

- * The script successfully translates assembly-like instructions into machine code.
- * Error handling is implemented to catch potential issues during parsing. It shows how the assembler works.

Image change on the basis of song characteristics | *MATLAB, Digital Image Processing* **Sept 2023–Nov 2023**

- * I effectively implemented criteria based on frequency and amplitude to change images dynamically.
- * I synchronized image changes with bass music when applied to a song.

Smart Irrigation System using 8051 | *Assembly Language, 8051 Microcontroller, Proteus* **Mar 2023-May 2023**

- * I designed and developed a digital irrigation system using the 8051 microcontroller to automate and optimize water usage for agriculture.

Achievements

AMD Pervasive AI Developer Contest **February 2024 - August 2024**

Neuro Glove : Smart hand Rehabilitation Assistant

Hackster.io

Smart India Hackathon

September 2023

Regional Level

Nirma University

Education

Nirma University

2021 – 2025

Bachelor of Technology in Electronics and Communication Engineering | PPI - 7.52/10

Ahmedabad, Gujarat, India
